WING PADDLE  
2024

WING WILD

Paddle with high lift. Light, sturdy, designed for competitions. Requires good training. Due to its peculiar shape with a bigger surface in the initial part of the blade, this is the paddle that allows the most power during the initial phase, which always translates in a very agile, fast, and reactive paddling. It is suitable for any kind of water and it's a very common style in every type of canoeing. Available with a more flexible handle (Flex 6) in both circular and oval index, medium/low flexible handle (Flex 4) in a circular index, and with a rigid handled (flex 3) in a circular index.

SHAFT OPTION: Straight Round Flex 6, Straight Round Flex 6 Oval Index, Straight Round Flex 4, Straight Round Flex 3  
RECOMMENDED SHAFT STIFFNESS: We recommend stiffer shafts for bigger blades but any combination is possible.

WING EXTREME

Tear drop paddle. For sprint and marathon racing paddlers, for surfski paddlers and for kayakers that want to try a more technical paddle. This blade has a very stable and powerful catch. There is a small ‘offset angle’ which anticipates the entry into the water and a high ‘pitch angle’. This blade has much of its surface area near the tip to get a good hold on the water very quickly.

WING SPRINT

Paddle with high lift. Light, sturdy, designed for competitions.  
Requires good training. Allows good lift in the initial phase, which gradually diminishes during the following phases of the paddling in order to ensure a good felxibity in the initial phase of the next stroke.  
A very good solution for any kind of water recommended for speed, marathon, surfski and wildwater.  
Available with a more flexible handle (Flex 6) in both circular and oval index, medium/low flexible handle (Flex 4) in a circular index, and with a rigid handled (flex 3) in a circular index.

RECOMMENDED SHAFT STIFFNESS: We recommend stiffer shafts for bigger blades but any combination is possible.

Water Paesano

TOURING PADDLE  
2024

KAYAK LOW ANGLE

Light, sturdy, easy to use, and reliable over time. Suitable for rides on the sea, lake, and calm rivers. Designed to ease the burden on the muscle and joint during long rides at sea. During the paddling, it allows the body to take an easy and natural position, allowing a pleasant cruising. Designed, prototyped and built in 100% carbon with prepreg in autoclave. In the adjustable version, this paddle has a system to change the length and the angle made in high-tech plastic or aluminum. Available with a more flexible rounded or oval indexed shaft (Flex 6), medium/low flexible rounded shaft (Flex 4), and with a rigid rounded shaft (flex 3).

SUP PADDLE

2024

SUP PROMPT

For well conditioned paddlers looking for dynamic SUP. The long rectangular shape allows incremental power. The long and narrow blade with flat profile and 11 degree blade angle combines instant efficient power delivery with a forgiving feel. Full Carbon construction cured in autoclave at high temperature and pressure, the result of this construction is a paddle with excellent mechanical properties, lightness, durability and reliability. Available with fixed carbon handle with an oval or circular index or with adjustable carbon handle Vario 2 Piece or Vario 3 Piece.
